ONBOARD CATERING SOLUTIONS

Where airline identity, operational performance and sustainable innovation meet.

A coordinated molded-fiber system designed to simplify onboard service and waste management.

ALTER ECO PULP & MOJEN

AN INDUSTRIAL PARTNER FOR THE ONBOARD ECOSYSTEM

01

WHO WE ARE

Alter Eco Pulp and Mojen

Alter Eco Pulp develops bespoke premium fiber solutions, while Mojen contributes its expertise in supplying onboard catering products across the aviation, rail, and maritime sectors.

02

WHERE WE PRODUCE

Made in Europe, built for scale.

Production is based in Tivoli, near Rome.
A second site is planned in Carsoli for December 2026, adding more than 10,000 sqm of capacity.

03

WHY NOW

The onboard material mix is under pressure.

Onboard catering still relies on complex multi-material systems. Airlines and caterers need to reduce single-use plastics and simplify waste streams with solutions that are easier to collect and manage after use.

04

WHY MOLDED FIBER

Industrial performance, premium tactile quality.

Fibers are sourced from annual plants such as sugarcane, bamboo, hemp and wheat straw, in configurations designed to support plastic-free, tree-free, PFAS-free solutions and fully recyclable.

Built for onboard operations.
Designed for a more responsible passenger experience.

THE PRODUCT ECOSYSTEM

From multi-material onboard waste to one coordinated, compostable mono-material system.

Pulp Tray

Custom geometry, compartments and embossed branding, tailored to each airline's service concept.

Fiber Cup & Lid

Coordinated beverage service with tactile branding, for hot, cold and alcohol-based drinks.

Pulp Casserole

Engineered for demanding catering environments, balancing handling efficiency with premium presentation.

Pulp Cutlery Kit

A coordinated fiber-based alternative designed to help simplify the onboard material mix.

One material family designed to simplify sourcing, onboard handling and post-use waste management.

FROM CONCEPT TO CABIN

FROM SERVICE REQUIREMENTS TO A CABIN-READY SYSTEM.

A

CREATE

We translate the service workflow into an engineered fiber solution.

B

CUSTOMIZE

The complete system can reflect each airline's identity.

- Custom Colors
- Mass Coloring
- Embossed
- Laser Marking
- Coordinated Shapes
- Cabin-Class Variants

C

QUALIFY

We design and validate the solution against the customer’s complete specification.

- ATLAS-type requirements
- Food-contact compliance
- PFAS-free
- Traceability

NOT A SINGLE PRODUCT.
A COMPLETE ONBOARD ECOSYSTEM.
